Email: ares.ada.dora@gmail.com  
Istanbul, Turkey

## EDUCATION

BSc, COMPUTER SCIENCE  
Ozyegin University | 2017-2023

High School, Math Science  
Ted Antalya College | 2013-2017

## TECHNICAL SKILLS

### Backend

- JAVA: Spring Boot, Quarkus, JPA/Hibernate, Redis, WebSocket, Cron Jobs, Concurrency
- GO LANG: Echo, Gin, GORM, Redis, WebSocket, Cron Jobs, Concurrency
- C#: .NET, .NET Core, ASP.NET

### Frontend

- React.js, Next.js, Redux Toolkit, TypeScript, TailwindCSS

### Web Services

- REST, SOAP

### Cloud & DevOps

- AWS: EC2, S3, RDS, Route53, CloudFront, ACM
- Huawei Cloud: ECS, OBS
- Docker
- CI/CD: GitHub Actions, Jenkins

### Databases

- MySQL, PostgreSQL, MSSQL, MongoDB, Redis

### Other

- Git, Linux, Agile/Scrum, Jira

## LANGUAGES

- Turkish - Fluent (Native)
- English - Fleunt in Written and Spoken
- Spanish - Intermediate

## WORK EXPERIENCE

### Software Developer, Ecurye Taşımacılık | 03/2025 - Present

- Contributed to the development of Ecurye's eco-friendly B2B and B2C transportation platforms. Involved in backend, frontend, and DevOps processes, gaining hands-on experience in building a real-time product from scratch and delivering it as a complete, production-ready solution.

### Software Developer, Likom Yazılım | 10/2024 - 03/2025

- Contributing to the ERP project by developing backend solutions, including E-Commerce and Cargo API integrations, as well as REST API and SOAP Web Services

### Software Developer, Tekno A Technology | 02/2023 - 10/2024

- Developed the Tekno A Web Platform for internal operations, enhancing Full Stack skills with Spring Boot, Express.js, and React.js, and contributed to deployment on the data center server.

## INTERNSHIP

### Software Developer, Garanti BBVA Technology

- Experienced in backend development with Spring Boot, including designing and implementing REST APIs, working on large-scale projects, and utilizing Jenkins for CI/CD processes.

### Software Developer, Tekno A Technology

- Set up the company's Database Management System and developed a desktop application to monitor and manage the company's database.

## PROJECTS

**Ecurye B2B and B2C Products:** Contributed across Backend, Frontend, and DevOps to develop Ecurye's B2B integrations, B2C platforms and features, including bulk order uploads via Excel, cargo and live tracking, SMS/email services, and e-commerce integrations.

- Backend: Go, Java (including WebSocket and Java Quarkus UDP server for real-time data streaming)
- Frontend: React.js
- Cloud: AWS, Huawei Cloud
- DevOps: CI/CD pipelines, Git, Jira for project management
- Database & Caching: MySQL, Redis

**Likom ERP Project:** Contributed to the development of an ERP system integrating marketplaces (e.g., Trendyol, Amazon) with shipping companies, enabling bulk product management and advanced analytics. Focused on marketplace and shipping integrations using REST APIs and SOAP Web Services. (C#, .NET)

**Tekno A Web Platform:** A web platform (including CRM) which is handling all internal operations of the company. Such as managing customers, products, maintenances, finance, reports, internal support tickets etc. I worked with both front end and back end of the project. (Spring Boot, React.js, MySQL)
